

Laser Dialogues

Laser Dialogues is a multimedia performance in which the main characters are Light, Sound and Movement. A dancer discovers and explores an unknown aesthetic dimension in which she acts cautious at first and with time finds her confidence. A musician interacts with a similar system which is not strange to him and he controls. Together, they get engaged in a dialogue in which each one plays in their own manner, but there is constantly a point of encounter.

The performance is based on the utilization of the Laser Harp and Laser Harp Q.

After the performance, the audience is invited to come on stage and interact themselves with the instruments for about 35 minutes.

Ada Ramzews - dancer // www.ada-ramzews.com
