

Light Portraits

Light Portraits is an innovative service provided to events in which, using professional Light Painting techniques and different light toys and sources, we create a unique portrait of our visitors, so they can take home a wonderful memory of your event. They are as well invited to become Light Artists themselves and participate in the creation of their own portrait!

The pictures can contain the logo of your company or event painted with light or as a watermark, and the visitors can get a print of the photography onsite, download them straight from our server via link or receive them via email.

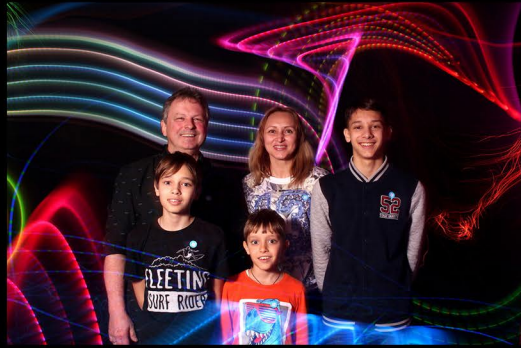

Our set up comprises a black out tent in which we make the portraits with professional photographic equipment; a DSLR digital photo camera, studio flash lights and a large amount of different custom-made light objects specifically made for this purpose. The photo camera is connected to a computer which allow us and the visitors to see the results in real time.

Light Portraits is a super fun experience for people all ages, and a great resource to offer your visitors a beautiful memory of your event.

We fit ourselves in very different circumstances so do not hesitate to contact us if you have a distinctive request. For sure we can work it out.

Technical requirements:

- Regular 220 Volts electricity socket
- 4mts x 7mts area to set up our 3mts x 6mts tent. We can also work in a 3mts x 3mts tent if the space is limited, but we highly recommend the bigger tent since it provides a much more comfortable experience for our visitors. If an isolated dark room is available, it is also possible to mount our set up there.

Setup time: 3 hours

Dismantling time: 1 hour
